The diagram illustrates an inheritance relationship. The base class, `boost::statechart::event< EvWaypoint1< TSource, TOrthogonal > >`, is shown in a white box with three horizontal compartments. The derived class, `cl_move_base_z::EvWaypoint1< TSource, TOrthogonal >`, is shown in a grey box with three horizontal compartments. A blue arrow with an open triangle head points from the derived class to the base class. The derived class has a public attribute `+ waypointIndex` in its second compartment.

```
cl_move_base_z::EvWaypoint1  
    < TSource, TOrthogonal >
```

```
+ waypointIndex
```
