Behavior::postKeyEvent

smacc::ISmaccClientBehavior
::postEvent

```
graph LR; A["cl_move_group_interface::CbMoveEndEffectorTrajectory::onOrthogonalAllocation"] --> C["smacc::ISmaccClientBehavior::postEvent"]; B["cl_keyboard::CbDefaultKeyboardBehavior::postKeyEvent"] --> C;
```

The diagram illustrates a mapping or inheritance relationship. On the left, two white rectangular boxes with black borders contain source function names. The top box contains 'cl_move_group_interface::CbMoveEndEffectorTrajectory::onOrthogonalAllocation'. The bottom box contains 'cl_keyboard::CbDefaultKeyboardBehavior::postKeyEvent'. On the right, a gray rectangular box with a black border contains the target function name 'smacc::ISmaccClientBehavior::postEvent'. Two blue arrows point from the right side of each source box to the left side of the target box, indicating that both source functions are mapped to or inherit from the target function.
