The diagram illustrates a mapping from two source functions to a single target function. Two white rectangular boxes on the left contain the source function names. Blue arrows point from each of these boxes to a single gray rectangular box on the right, which contains the target function name. The first arrow originates from the bottom-right corner of the top box and points to the top-left corner of the target box. The second arrow originates from the top-right corner of the bottom box and points to the bottom-left corner of the target box.
