The diagram illustrates an inheritance relationship. The base class, `boost::statechart::event< EvWaypoint29 < TSource, TOrthogonal > >`, is represented by a white box with three horizontal compartments. The top compartment contains the class name, while the other two are empty. The derived class, `cl_move_base_z::EvWaypoint29 < TSource, TOrthogonal >`, is represented by a grey box with three horizontal compartments. The top compartment contains the class name, the middle compartment contains the public attribute `+ waypointIndex`, and the bottom compartment is empty. A blue arrow with an open triangular head points from the derived class to the base class, indicating inheritance.
