The diagram consists of two class boxes. The top box is white and represents the base class `boost::statechart::event< EvWaypoint236 < TSource, TOrthogonal > >`. It has two empty rectangular compartments below the name. The bottom box is gray and represents the derived class `cl_move_base_z::EvWaypoint236 < TSource, TOrthogonal >`. It has two compartments: the top one contains the public member `+ waypointIndex`, and the bottom one is empty. A blue arrow with an open triangular head points from the bottom box to the top box, indicating inheritance.
