

boost::statechart::  
event< EvWaypoint113  
< TSource, TOrthogonal > >

```
classDiagram
    class Base["boost::statechart::event< EvWaypoint113< TSource, TOrthogonal > >"]
    class Derived["cl_move_base_z::EvWaypoint113< TSource, TOrthogonal >"]
    Derived --|> Base
```

The diagram illustrates an inheritance relationship. A blue arrow with an open triangular head points from the bottom class to the top class. The top class is white with a black border and contains the text 'boost::statechart::event< EvWaypoint113< TSource, TOrthogonal > >'. It is divided into three horizontal sections by two lines. The bottom section is empty. The middle section is empty. The top section contains the text. The bottom class is gray with a black border and contains the text 'cl\_move\_base\_z::EvWaypoint113< TSource, TOrthogonal >'. It is divided into three horizontal sections by two lines. The bottom section is empty. The middle section contains the text '+ waypointIndex'. The top section contains the text 'cl\_move\_base\_z::EvWaypoint113< TSource, TOrthogonal >'. The arrow points from the bottom class to the top class.

cl\_move\_base\_z::EvWaypoint113  
< TSource, TOrthogonal >

+ waypointIndex
