

```
boost::statechart::  
event< EvCbSuccess<  
  AsyncCB, Orthogonal > >
```

The diagram illustrates an inheritance relationship between two C++ classes. The base class, `boost::statechart::event< EvCbSuccess< AsyncCB, Orthogonal > >`, is shown in a white box at the top. The derived class, `smacc::EvCbSuccess< AsyncCB, Orthogonal >`, is shown in a gray box at the bottom. A blue arrow with an open triangular head points from the derived class to the base class, indicating that `smacc::EvCbSuccess` inherits from `boost::statechart::event`. Both class boxes are divided into three horizontal compartments, with the first compartment containing the class name and the others being empty.

```
smacc::EvCbSuccess  
< AsyncCB, Orthogonal >
```
