

smacc\_sm\_reference  
\_library/sm\_packml/include  
/sm\_packml/states/st\_stopping.h

```
graph BT; A["smacc_sm_reference_library/sm_packml/src/sm_packml_node.cpp"] --> B["smacc_sm_reference_library/sm_packml/include/sm_packml.h"]; B --> C["smacc_sm_reference_library/sm_packml/include/sm_packml/states/st_stopping.h"];
```

The diagram illustrates a dependency chain between three files. At the bottom is a source file, in the middle is a header file, and at the top is a state file. Blue arrows point upwards from the source file to the header file, and from the header file to the state file, indicating that the source file depends on the header file, which in turn depends on the state file.
