

```
sm_fetch_two_table  
_whiskey_pour::recovery  
_screw::StRecoveryScrewThird  
::onSuccess
```

The diagram consists of two rectangular boxes connected by a blue arrow pointing from left to right. The left box is light gray and contains four lines of C++ code. The right box is white and contains a single line of C++ code representing a lambda expression. The arrow indicates a transformation or mapping from the code in the left box to the code in the right box.

```
smacc::SmaccState<  
StRecoveryScrewThird,  
SS >::throwSequenceFinishedEvent
```
