The diagram shows a class hierarchy. The base class is 'boost::statechart::event< EvWaypoint185< TSource, TOrthogonal > >'. It has two empty compartments below the name. The derived class is 'cl_move_base_z::EvWaypoint185< TSource, TOrthogonal >'. It has a third compartment containing '+ waypointIndex' and a fourth empty compartment. A blue arrow with an open triangle head points from the derived class to the base class.
