

```
sm_dance_bot_2::StEventCount  
Down::staticConfigure
```

```
graph LR; A["sm_dance_bot_2::StEventCount  
Down::staticConfigure"] --> B["smacc::SmaccState<  
StEventCountDown, MsDance  
BotRunMode >::static_createState  
Reactor"]
```

A diagram showing a call from a static method to a static function. A grey box on the left contains the code `sm_dance_bot_2::StEventCountDown::staticConfigure`. A blue arrow points from this box to a white box on the right. The white box contains the code `smacc::SmaccState<StEventCountDown, MsDanceBotRunMode >::static_createStateReactor`.

```
smacc::SmaccState<  
StEventCountDown, MsDance  
BotRunMode >::static_createState  
Reactor
```
