

```
sm_dance_bot_2::StEventCount  
Down::staticConfigure
```

```
graph LR; A["sm_dance_bot_2::StEventCount  
Down::staticConfigure"] --> B["smacc::SmaccState<  
StEventCountDown, MsDance  
BotRunMode >::static_createState  
Reactor"]
```

A diagram showing a call from a static method to another static method. A grey box on the left contains the text 'sm\_dance\_bot\_2::StEventCount' and 'Down::staticConfigure'. A blue arrow points from this box to a white box on the right. The white box contains the text 'smacc::SmaccState<', 'StEventCountDown, MsDance', 'BotRunMode >::static\_createState', and 'Reactor'.

```
smacc::SmaccState<  
StEventCountDown, MsDance  
BotRunMode >::static_createState  
Reactor
```
