

cl_move_group_interface
::CbMoveEndEffectorTrajectory
::onOrthogonalAllocation

cl_keyboard::CbDefaultKeyboard
Behavior::postKeyEvent

smacc::ISmaccClientBehavior
::postEvent

```
graph LR; A["cl_move_group_interface::CbMoveEndEffectorTrajectory::onOrthogonalAllocation"] --> C["smacc::ISmaccClientBehavior::postEvent"]; B["cl_keyboard::CbDefaultKeyboardBehavior::postKeyEvent"] --> C;
```

The diagram illustrates a mapping from two source functions to a single target function. Two white rectangular boxes on the left represent the source functions: 'cl_move_group_interface::CbMoveEndEffectorTrajectory::onOrthogonalAllocation' (top) and 'cl_keyboard::CbDefaultKeyboardBehavior::postKeyEvent' (bottom). Blue arrows point from each of these boxes to a single gray rectangular box on the right, which represents the target function: 'smacc::ISmaccClientBehavior::postEvent'.
