The diagram shows a class hierarchy. The base class, 'boost::statechart::event< EvWaypoint209 < TSource, TOrthogonal > >', is represented by a white box with a black border. It has two empty rectangular compartments below its name. The derived class, 'cl\_move\_base\_z::EvWaypoint209 < TSource, TOrthogonal >', is represented by a grey box with a black border. It has two compartments: the top one contains the public attribute '+ waypointIndex', and the bottom one is empty. A blue arrow with a hollow triangular head points from the derived class box up to the base class box, indicating inheritance.
