

cl_move_base_z::CbUndoPath
Backwards2::onEntry

cl_move_base_z::CbUndoPath
Backwards2::update

cl_move_base_z::Pose
::toPoseMsg

```
graph LR; A["cl_move_base_z::CbUndoPath  
Backwards2::onEntry"] --> C["cl_move_base_z::Pose  
::toPoseMsg"]; B["cl_move_base_z::CbUndoPath  
Backwards2::update"] --> C;
```

The diagram illustrates a mapping from two source functions to a single target function. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'cl_move_base_z::CbUndoPath Backwards2::onEntry' and the bottom box contains 'cl_move_base_z::CbUndoPath Backwards2::update'. On the right, there is a gray rectangular box with a black border containing the text 'cl_move_base_z::Pose ::toPoseMsg'. Two blue arrows point from the right side of each white box to the left side of the gray box, indicating that both source functions are mapped to the target function.
